ALLOSAURUS  
FOSSIL  
PTERODACTYL  
STEGOSAURUS

BRACHIOSAURUS  
IGUANADON  
TREX  
DIPLODOCUS

DINOSAUR  
TRICERATOPS  
FOOTPRINT  
VELOCIRAPTOR

Q: Do you know which one is not actually classed as a dinosaur?

A: It's the Pterodactyl. Pterodactyl is the common term for the winged reptiles properly called pterosaurs, which belong to the taxonomic order Pterosauria. Pterosaurs lived among the dinosaurs and became extinct around the same time, but they were not dinosaurs, they were flying reptiles.
